

Wave Your Way: Deploy Personalized Gesture Recognition using ToF Sensors with MATLAB and STM32Cube.AI Dev Cloud

Hardware and Software Requirements

To participate in the workshop, you need:

1. A laptop
2. Google Chrome browser
3. A MathWorks account
4. A myST Account

You will be provided with a temporary MATLAB workshop license that will give you access to all products used in the workshop, as well as the workshop exercise files. Access to STM32Cube.AI Dev Cloud is public and free.

Please download a copy of this document to be able to click on the links provided.

Need Help?

If you run into any issues completing the steps below, we will assist throughout the workshop exercises.

Step I. Set Up Your MathWorks Account

If you don't have a MathWorks account, you need to create one to get access to MATLAB Online and the material for this event. You will need access to your email on the machine you are using to create the account.

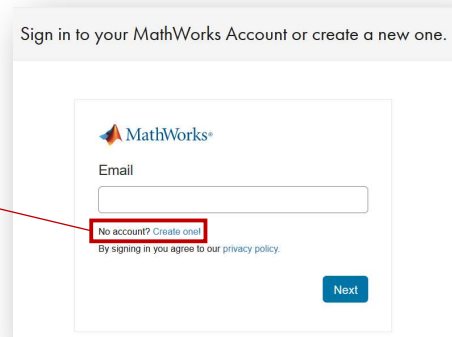

1. In Google Chrome, go to:
<https://www.mathworks.com/mwaccount/> and click **Create one!** next to No Account?:

No account? [Create one!](#)

2. Fill out the form and click **Create**. Follow the directions for verifying your email address.
3. To complete your registration, click the link in the verification email and fill out the form.

You must check the Online Services Agreement box.

You may leave these fields blank: Activation Key or License Number, Sales rep contact, Associate with a license, Trial

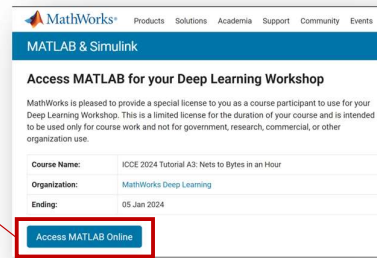

Step II. Activate the Workshop License

The workshop uses MATLAB Online. You must activate the workshop license to participate. You can activate this license starting from the day of the workshop up to a week after the workshop date.

1. Navigate to this address in Google Chrome:
Link will be shared in the readme page a week before the workshop.
2. If you are not already logged in, do so.

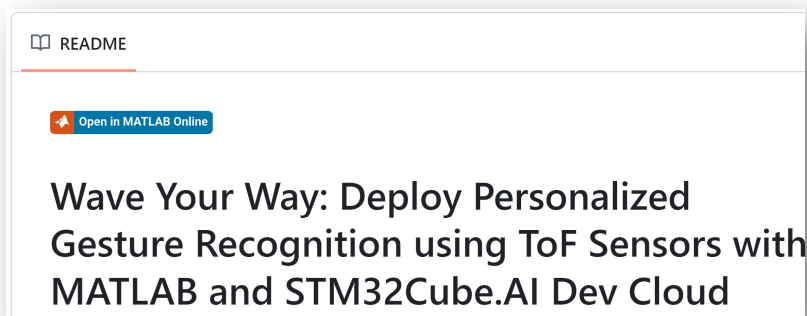

3. Click **Access MATLAB Online**.

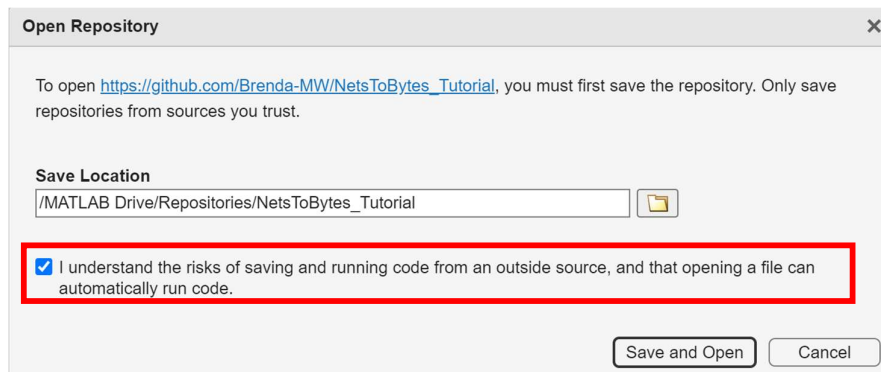

Step III. Access Exercise Files

MATLAB Online can port your workshop files from GitHub automatically. You will see a dialog pop-up for saving and opening the repository of files.

1. Exercise files are located at: https://github.com/Brenda-MW/WaveYourWay_Workshop
2. Directly launch the workshop links from the “Open in MATLAB Online” button in README.

3. Click on the checkbox to accept outside source code.
4. To access the files, hit “Save and Open”.

Step IV. Verify Your Environment

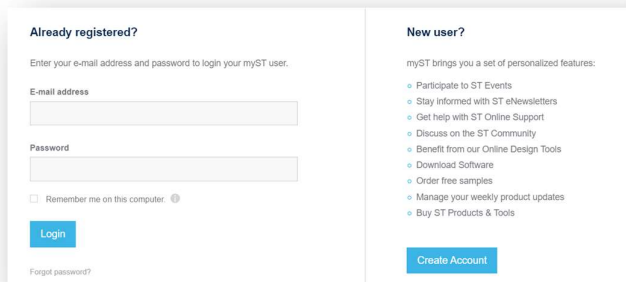

To verify that your environment is correctly set up for the exercises:

1. Run the command below in the MATLAB Online Command Window:
>> WaveYourWay_Setup
2. Confirm that the **welcome message** is displayed.

Step V. Create myST account

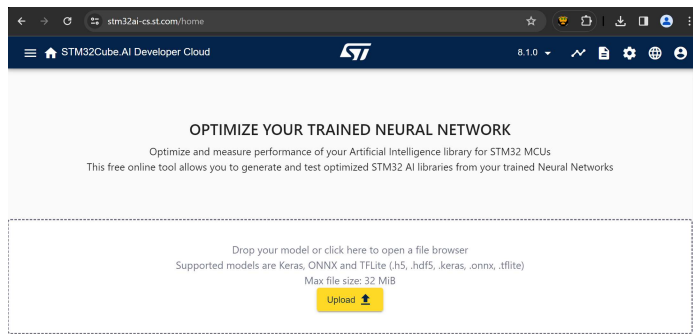

If you don't have a myST account, you need to create one to get access to STM32Cube.AI Dev Cloud and use the material for this event. You will need access to your email on the machine you are using to create the account.

1. Navigate to this address in Google Chrome: stm32ai-cs.st.com/home and click *Sign In*
2. Create an account by filling out the form and click Create. Follow the directions for verifying your email address.
3. To complete your registration, click the link in the verification email and fill out the form.

The image shows a login and registration form for myST. It is divided into two sections: 'Already registered?' and 'New user?'. The 'Already registered?' section has fields for 'E-mail address' and 'Password', a 'Remember me on this computer' checkbox, a 'Login' button, and a 'Forgot password?' link. The 'New user?' section lists features of myST and has a 'Create Account' button.

4. Successful log on shows the interface to upload models.

Congratulations! You are all set up to join us on the hands-on workshop! Have fun!
